## PRODUCT INFORMATION

All cuddly, soft fabrics are organically sourced (kbA), machine-washable and suitable for tumble drying.

Manufactured under highest quality standards, with certificate und quality seal.

Baby doll that can drink and use the potty.

This doll is suitable for little ones (0+).

Multi-joint standing doll.

This Götz manufactured doll is produced under the highest quality standards, it is numbered and limited.

Doll clothing is made from light and particularly soft material.

Bath baby.

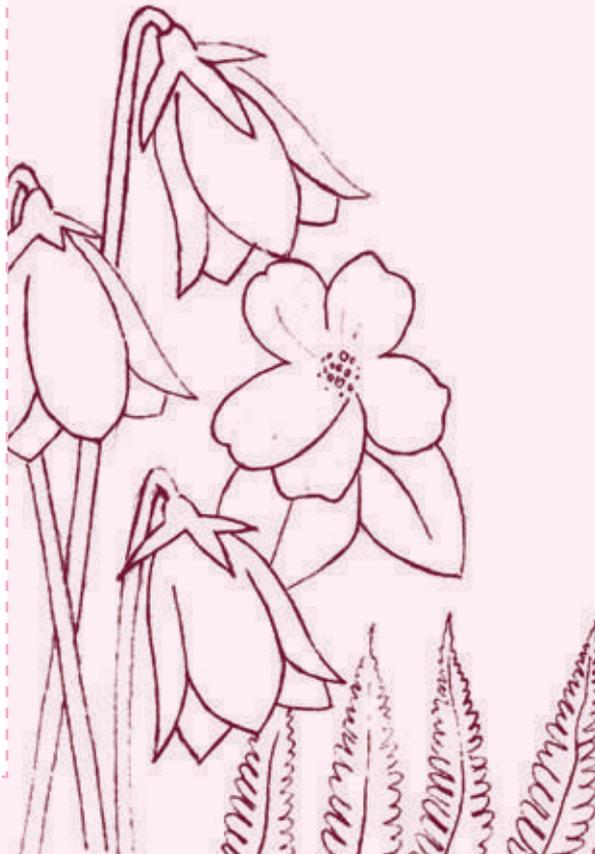

This doll is safe for children 18 months and up.

Dolls with soft bodies, covered in a pillow case, can be machine washed (cold) and put into the drier. Dolls with hard bodies can be washed with a damp cloth. Clothing machine-washable (cold).

Doll with pacifier.

# Welcome

## TO OUR WORLD OF DOLLS 2017

Children love to dress their dolls, to see how wonderfully everything can be coordinated. Creative play endows children with a world they can experience in active role play only. Even more so they can assimilate all the impressions they have daily. The neutral look of our Götz girls and babies allows the child to interpret any emotion, like joy, sorrow or affection – they can feel understood. Our dolls are tested for 3 years and up. Especially selected dolls tested for 0 or 18 months and up you will find marked with our age-icon. Our Götz girls are safe for children 3 years and up – recommended by Götz for 5 years and up, since this age ensures that the children have developed the necessary motor skills for happy and creative play.

Deliberately abstaining from electronic functions, fantasy can unfold boundlessly. Redundant amenities are reduced, the child can concentrate on play completely. Cognitive abilities such as learning, thinking, empathizing, or memory are stimulated, as well as creativity and fine motor skills, thanks to endless variation and detail.

Sincerely yours  
The Götz Family

OUR TIP

GOOD TO KNOW

# Our Girls ...

**Götz girls** are friends every girl desires. Fully jointed, they allow free play in any pose imagined. Time for a change in look, then their hair can be washed, combed and styled fashionably.

## GÖTZ HANDCRAFTED DOLL

HANNAH is a Götz handcrafted doll produced under highest quality standards and limited. She wears the Götz seal and has a numbered certificate.

Chloe, Paula, Lucia, Guiseppina und Mia - one of them is just like you in eye- and hair color. Find yourself in the **JUST LIKE ME**-doll that will be your best friend.

**HAPPY KIDZ** are handcrafted dolls as well. Flexible shoulder, elbow, hip, knee and neck joints allow endless possibilities and creative play.

Our **PRECIOUS DAY** girls have sleep eyes, their body is soft with ball jointed arms and legs. They can stand by themselves.

# & Babies

**Götz baby dolls** are for the little ones just like real babies. They look into the world with their curious eyes, long for a hug, want to be pampered and carried around. Their soft touch makes them irresistible. You want them to be with you night and day. The Aquini bath babies can join you for a bath or can be bathed. **Simply must be loved...**

Our little **GÖTZ MUFFINS** are your child's darling. All Muffins have sleep eyes, ideal to love and cuddle - first creative play. The dolls are stuffed with soft synthetic wool and granules. They can be dressed and undressed with ease.

## **COSY & CUDDLY BATHBABIES**

The soft body filled with soft beads make our Cosy Aquini to be a cuddly friend and a bath baby at the same time. Due to the soft filling the doll can float and after bathing fun it will air-dry in a short while.

The **GÖTZ AQUINI BATHBABIES** are modelled anatomically correct. The painted eyes make the dolls come alive. The dolls are 100% waterproof. Only bottle-fed water leaves the body. Each Aquini doll has its own potty, feeding bottle and towel.

The doll collection **BABY PURE** are like brother and sister. Developed especially for the very little ones, they are created with care to security, durability and ecological value. Naturally all babies can be machine washed and tumble dried. All upper fabrics are organic.

## *Sun and Sea*

Elisabeth loves the sea. No summer passes without a holiday at the sea. She jumps into the sea to cool off from the warm sun, she builds big sandcastles together with friends she met on the beach. Last year her big brother allowed her to bury him in the sand. She got new sand molds for her birthday this year as well as armbands. Both are must-haves for the beach this year.

## WHAT IS A SEAHORSE

Seahorses are the slowest fish on earth. They make 1,5 meter an hour, even snails are faster. Why they are called seahorse you can guess by looking at them. They look like a leg-less horse. Unfortunately you cannot have a ride under water with them, since they only become 35 cm tall. With their trumpet-shaped mouth, they absorb tiny sea animals. They even hear with it. By the way seahorses swim upright. To speed up they use their little dorsal fins. Their long and thin tail can roll up and grasp. Imagine seahorses can move their eyes separately, to search for food with one eye and watch for enemies with the other.

*In Germany there exists another seahorse. It is a badge you receive when you proof that you can swim. Do you have it also?*

## GOOD TO KNOW

### WHY DO SANDCASTLES COLLAPSE WHEN WET?

Entering water suppresses the air between the sandcorns. Since those are round shaped, they roll apart and basically are flooded away.

## *Having Fun at Sports*

---

Hannah loves Physical Education, especially gymnastics. Can you believe it, she does a handstand. Since she saw a ballet in the opera house, she also takes ballet lessons. Wearing her ballet dress she feels so elegant and beautiful, just like a prima ballerina.

With her best friend she shares another hobby - horse-back riding. When the weather is nice, she enjoys it most, for she can lead the ponies to the paddock and feed them with grass.

## Emphasize on Exercise

Sports are very important for your whole body just as for your brain and soul. There are countless kinds of sports, but they are alike in one thing: you can look marvellous. Whether on the tennis court or on your bike, whether alone or with friends. Number one sports in Germany is not football, but biking with 27,1%. This is not surprising, for many people in Germany use the bicycle to get from A to B.

## WHAT EXACTLY IS YOGA?

Imagine you have the bravery of a lion, the strength of a gorilla and the liveliness of a frog – a wonderful feeling to be achieved with just a little practice. For hundreds of years yoga is not only sports but a lifestyle, training thoughts, body and soul. By the way if you practice yoga, you are a yogi. The first yogis did live in alignment with nature. So many poses are named after nature like the flower.

*You want to try this "flower" position?*

Sit down on the floor, bend your knees and position your feet on the floor. Slide your bent arms under your knees of your bent legs. The right arm under the right knee and the left arm under the left knee. You need to round your spine to do that. Now lift your feet with a slight push, to hold them in the air. Can you feel it, you balance your whole body and all your muscles must work as well as your brain. It only works if you concentrate on it. Being a flower long enough – lay down on your spine in savasana and feel the sensation!

# *Celebrating New Year's Eve With Friends*

Emma celebrates New Year's Eve with her parents – a grand New Year's Eve party. For the friends of her parents have daughters her age – it will be a super party – for sure. Already Emma planned on some games to play during the evening. There will even be fireworks at midnight. Emma's mum brought lead pouring, which is a traditional game for New Year's Eve in Germany. You heat the lead and pour it into cold water- the creature arising gives hints for your year. Let's see what the future will bring for the new year.

## WHAT IS A PHOTOBOOTH?

A photobooth basically is nothing more but a mobile photoautomat, where you can take snapshots by a self-timer. The background of the picture is open to your creativity. It could be a colorful wallpaper, a sofa or chair – let your creativity be endless. In many cases there are disguises as well, like wigs, cut out pieces like hats, bows or funny lips, which you hold in front of your face to disguise. So you create funny pictures as you wish. The photos can be treasured in an album, you can also create a film with background music with them.

*Together with Hannah loves party glamour you can make the funniest photos. She brings the disguise masks for you and herself.*

**GOOD TO KNOW**

**WHY DO WE CELEBRATE NEW YEAR'S EVE?**

It originates from a heathen custom. For a long time the Christian community named all religions not belonging to them as heathen. Also they included the old Germanic tribes, who believed, that Wotan, their god of war, would walk abroad, especially in the darker seasons of the year.

This time of the year is called "Rauhnächte" – the 31st of December falls into that period. They believed that Wotan set forth with his spooks on exactly that day. To cast them out they made a lot of noise. This belief is passed on and results in the New Year's Eve fireworks, masquerades and noisy celebrations.

# Coco Cherry Milk

## INGREDIENTS:

2 cl coconut syrup  
8 cl milk  
12 cl nectar of cherries  
ice cubes  
shaker  
1 fancy glas (balloon shaped glas),  
single cream  
glitter to decorate  
straw

1. Put coconut syrup, milk, nectar and ice cubes into the shaker.
2. Shake well to mix thoroughly.
3. Pour into your glas onto some ice cubes and decorate with cherries. Add a straw.

Can you find the right sticker?

## Feeding Ducks in the Park

Elisabeth enjoys strolling in the park next to her grandma's home. It is not far to go to reach the little duck pond there. Grandma keeps old bread crumbs for her to feed the ducks. Sitting on the little wooden bench, she could watch them for hours. Sometimes her friend Hannah with her dog Frodo accompany Elisabeth. Together they have a picnic with delicious cake made by Hannah's mum. They throw a stick for Frodo until he wearily curls up on the blanket. Shhh - can you hear him snoring?

# Popsicle

## MATERIAL:

- print out the cone pattern (use strong paper)
- a variety of crayons
- scissors and cutter
- small glue stick and liquid glue
- several popsicle sticks

1. To download the pattern, visit our painting & puzzles website and print onto the paper. [goetz-puppen.de/de/malen-und-raetseln.html](http://goetz-puppen.de/de/malen-und-raetseln.html)
2. Color your pattern.
3. Cut along the continuous lines and bend along dashed lines.
4. The lower line carefully cut with the cutter (**please let your mum, dad or grandparents help**)
5. The large part coat with glue on the edges.
6. Now glue the wooden stick onto the lower edge - finished!

## WHY DON'T DUCKS DROWN?

Ducks live in ponds, lakes or rivers. They are adjusted to the wet element perfectly. Their plumage on breast and tummy is mainly in the water, therefore it is tightly covered by down feathers, which again are protected by feathers.

Within the plumage there is a lot of air which not only protects its body but also uplifts it, to help swimming with ease. The duck swims like sitting on a rubber boat. To avoid water entering, the duck greases its plumage carefully and frequently by pressing its beak onto its oil gland.

*Do you know, what else is called a duck?*

1

*Your doll is well dressed for all the spring fairs.*

2

## GOOD TO KNOW

### WHY DON'T BIRDS FALL OFF THE CURRENT LINE?

Since they are not grounded. Electrical power flows in a circle. Which means either back into the socket or into the ground where it originated. Think about a big mountain lake whose water is flowing down slowly in a long and twisted beck ending in a valley. This is where you find a power station which pumps the water back up again. As long as the bird stays on the line, it is comparable

to sitting somewhere in the beck. Despite water floating past it, it will not be entrained. Only if the bird touches one of the steel masts whilst sitting on the current line, since in this case it is grounded, his life is endangered. In this case the electric power chooses the fastest way through the bird into the mast ending in the ground.

## *Splish, Splash*

There is nothing better than visiting the swimming pool. Marie loves to float in the water on her back to watch the sparkling sun in the water with her armbands on. Of course she enjoys the yellow water slide just as much. At first her mum needed to hold her, but now she has the courage to slide on her own. But guess what she enjoys most! Mum treats her with jelly babies, when they are at the swimming pool.

GOOD TO KNOW

WHY DOES THE HEARING DIFFER UNDER WATER?

When diving in the swimming pool we hear differently. Noises are dull and speech is barely understandable. Our ears are not made to hear under water. Instead they adjusted to hear in

the air over the years of evolution. Our eardrum develops vibration by airborne noise easily, but under water this vibration is prevented, due to the water pressure.

## WHY DO EYES BURN WHEN IN THE POOL?

Certainly you know the smell that hits you when jumping into the pool. It does not smell like the sea nor like a lake, but very different. What you smell is chlorine. It is a chemical element, which functions as a disinfectant when mixed with water. This is important, since some people jump into the pool without having had a shower beforehand. Uuughs!

It removes bacteria and dirt. Used within legally approved quantities, chlorine does not harm us. But sometimes you will get red eyes or very dry skin when swimming in the pool. This is not caused by the chlorine, but by it having mingled with the bacteria or dirt. When chlorine is banded, it develops its typical smell.

Just shower well after a swim in the pool and the smell of chlorine fades and your eyes recover.

## *Swinging over the Ice*

---

For weeks Emily has been waiting for icy temperatures and the snow. She got new ice skates for Christmas with glitter shoelaces, and now she cannot wait to try them. Last year she nearly managed to pirouette! But the icy temperatures did not last long enough for her to practice the pirouette to perfection. The ice on the lake melted. Maybe she is lucky tomorrow, the weather forecast predicted minus degrees for the night. Keep your fingers crossed!

## GOOD TO KNOW

### WHAT DO FISH DO IN A FROZEN LAKE?

The ice on the lake functions like an isolation, therefore freezing air cannot freeze the complete water in a lake deeper than one meter. On the lake's ground it is 4 degrees Celcius always. This is caused by the fact, that water is the heaviest at 4 degrees Celcius. Water this temperature is always on the ground of the lake. Fish find the warmest spot, which in this case is the ground.

Some fish even dig themselves into the ground, hibernate practically. Most of the fish stay awake, but act very calm in winter. Their metabolism works at a minimum, the body temperature is lowered so they can live on the fat they accumulated during summer combined with the little amount of plants and small creatures living in the lake.

## HOW DO SNOW FLAKES FORM?

Dust is very important for snow: it emerges from little grains of dust which will be covered by miniature water particles – when icy they freeze to ice crystals. Each single one chooses its own route down to earth. Sometimes flying through warm air, sometimes cold air, sometimes humid or dry air. Therefore the ice crystals all grow in a different shape. They can be the most beautiful little stars, where six little sparkling arms lead from the center. They also can look like a boring screw nut. And do you know why snowflakes are white? Snow consists of water, which is colorless. But snowflakes appear white, which is not a miracle, since the water is frozen to thousands of little icy particles, called ice crystals. Each single crystal is not visible for being so tiny. But altogether they create a beautiful snowflake in white.

*Snow is falling to earth with the speed of 4 km per hour. It needs 15 minutes to reach the earth.*

## Decorative Stars

### MATERIAL:

8 pieces of grease-proof paper bags  
pencil & glue stick  
scissors & thread

1. Follow the shape of a "T" with the glue stick onto the paperbag and glue one bag after the other on top of each other.
2. Draw a tip on to the edge of the open part of the bag and cut it.
3. On one side again you do glue the "T". Then you can fold up the star and glue it. Help from a parent or grandparent would be beneficial.
4. Nearly done - just glue the thread into the star and hang it up.

*Differently shaped tips make for different looking stars!*

# *The Amazing World of Fairies*

---

Paula is the little fairy offspring. Her last birthday gift was a butterfly shaped magical wand to reward her for the many wishes she makes come true every day. Now if she wants to fly through the sky with her best friend, just a wand swing lets the fairyland visitor grow wings. They love to spend time together, so Princess Chloe sees Paula in her amazing world as often as possible. Then they endlessly play with the fairyland animals and hold tea parties packed with goodies.

The illustration shows a nursery room. At the top, a canopy is suspended with a mobile hanging from it. The mobile features a crescent moon and several stars. A small cat is perched on the edge of the canopy. Below the canopy, a baby is lying in a cot, which is partially visible in the bottom right corner. The cot has a blue base and a white top with a patterned blanket. The overall style is a simple line drawing with some color washes.

## *Hustle and Bustle Amongst the Toddlers*

Emily's little sister joined the nursery school this morning, so mum can run errands. Emily accompanied her the first day. She was allowed to see everything. How many marvellous toys there are, although most of the toddlers are so little still. A nurse makes sure that all babies get their bottle. The older children have a tasty lunch, like Emily's favourite meal spaghetti with tomato sauce! They even have to hold their afternoon nap, Emily is relieved – she can stay up. So she can use the time to play and not waste it sleeping.

## HOW DO YOU GROW?

Growth depends on the cells our bodies are made of. Our genes, the predisposition, hold the instructions how to grow right from the beginning. To grow the cells need food as well as water and many other nutrients like protein, starch, vitamins or fat. When growing, new cells are developed, they emerge from splitting of old cells. The faster they split, the faster a human being grows.

Toddlers grow fastest in their first three years. Limbs or organs can grow with different pace. Later growth slows down. Reaching puberty it speeds up again. Hormones are responsible for the final size of the body. They strengthen muscles as well as bones.

Getting older the hormone production is reduced, the body cannot transfer nutrients into energy as fast anymore. The muscles diminish. All together it is called aging.

SING A SONG BEFORE YOU GO TO SLEEP

# Singing Fun

## Evening Song The Moon Has Risen

Matthias Claudius | Johann Abraham Peter Schulz

Am D G Em Am D7 G  
The moon has ri - sen the ti - ny gold - en sta - rs shine in the

5 Am D Am D G  
heav - ens bright and clear. The forest stands dark and si - lent and

9 Em Am D7 G Am D G  
from the mead - ows cli - mbs a won - drous whi - te mi - st.

### Strophe 1

How still is the world,  
And in the veil of twilight,  
As comfortable and lovely  
As a quiet chamber,  
Where the misery of the day  
You will sleep away and forget.

### Strophe 2

Do you see the moon standing there?  
There is only half of it to see,  
And yet it is round, and fair!  
So it is with many things  
That we mock confidently,  
Because our eyes see them not.

# The Perfect Layette

GOOD TO KNOW

WHY DO PEOPLE SNORE WHEN SLEEPING

Often when sleeping you breathe through your mouth for example due to a cold. Furthermore the cheeks relax and cause dropping of the lower jaw. Tongue and velum can block the respiratory system, so you breathe through your mouth

to fill your lung with air. The constriction of the respiratory system causes that uvula, pharyngeal wall or velum swing by the airflow of breathing in. Voila the typical snoring sound is created.
