3. Interesting and trivia

OUR TIP

GOOD TO KNOW

Children love to dress their dolls, to see how wonderfully everything can be coordinated. Creative play endows children with a world they can experience in active role-play only. Even more so they can assimilate all the impressions they have daily. The neutral look of our Götz girls and babies allows the child to interpret any emotion, like joy, sorrow or affection – they can feel understood. Our dolls are tested for 3 years and up. Especially selected dolls tested for 0 or 18 months and up you will find marked with our age icon. Our Götz girls are safe for children 3 years and up – recommended by Götz for 5 years and up since this age ensures that the children have developed the necessary motor skills for happy and creative play.

Deliberately abstaining from electronic functions, fantasy can unfold boundlessly. Redundant amenities are reduced, the child can concentrate on play completely. Cognitive abilities such as learning, thinking, empathizing or memory are stimulated, as well as creativity and fine motor skills, thanks to endless variation and detail.

Sincerely yours
The Götz Family

The Girl Crew

Götz girls are friends every girl desires. Fully jointed, they allow free play in any pose imagined. Time for a change in look, then their hair can be washed, combed and styled fashionably.

Chloe, Paula, Lucia, Guiseppina and Mia – one of them is just like you in eye and hair colour. Find yourself in the **JUST LIKE ME**-doll that will be your best friend.

GÖTZ HANDCRAFTED DOLL

HANNAH is a Götz handcrafted doll produced under highest quality standards and limited. She wears the Götz seal and has a numbered certificate.

Our **PRECIOUS DAY** girls have sleep eyes, their body is soft with ball jointed arms and legs. They can stand by themselves.

HAPPY KIDZ

are handcrafted dolls as well. Flexible shoulder, elbow, hip, knee and neck joints allow endless possibilities and creative play.

Cuddly Babies

Götz cuddly babies are for the little ones just like real babies. They look into the world with their curious eyes, long for a hug, want to be pampered and carried around. Their soft touch makes them irresistible. You want them to be with you night and day. The Aquini bath babies can join you for a bath or can be bathed. **Simply must be loved...**

COSY & CUDDLY BATHBABIES

The soft body filled with soft beads make our Cosy Aquini to be a cuddly friend and a bath baby at the same time. Due to the soft filling the doll can float and after bathing fun it will air-dry in a short while.

new

Our little **GÖTZ MUFFINS** are your child's darling. All Muffins have sleep eyes, ideal to love and cuddle – first creative play. The dolls are stuffed with soft synthetic wool and granules. They can be dressed and undressed with ease.

The **GÖTZ AQUINI BATHBABIES** are modelled anatomically correct. The painted eyes make the dolls come alive. The dolls are 100% waterproof. Only bottle-fed water leaves the body. Each Aquini doll has its own potty, feeding bottle and towel.

new

The doll collection **BABY PURE** are like brother and sister. Developed especially for the very little ones, they are created with care for security, durability and ecological value. Naturally, all babies can be machine washed and tumble dried. All upper fabrics are organic..

Celebrating New Year's Eve with Friends

Emma celebrates New Year's Eve with her parents - a grand New Year's Eve party. For the friends of her parents have daughters her age - it will be a super party - for sure. Already Emma planned on some games to play during the evening. There will even be fireworks at midnight. Emma's mum brought lead pouring, which is a traditional game for New Year's Eve in Germany. You heat the lead and pour it into cold water- the creature arising gives hints for your year. Let's see what the future will bring for the new year.

GOOD TO KNOW

ONLY EVERY FOUR YEARS THERE IS A 29TH OF FEBRUARY. WHY?

You may know that there is a leap year every four years, but do you know why?

Our calendar has 365 days a year since it takes the earth that time to circle around the sun. But this is not exactly true. Actually, it takes the earth 265 days, 5 hours and 48 minutes. If the year had 365 days only, New Year's Eve would be sometime in summer. Therefore, we need a so-called leap year with one additional day, every fourth year. This additional day is the 29th of February. So we can celebrate New Year's Eve at the same time always.

Garland-Pennants

You need:

- pencils
- stiff cardboard
- scissors
- string to thread together

To download the pattern, visit our painting & puzzles website and print onto the paper goetz-puppen.de/en/painting-und-puzzles.html

1. Carefully cut out the pattern below – your parents or grandparents will love to give you a hand. To copy as many pennants as needed, just trace the shape with a crayon onto your cardboard. The longer you wish your garland to be, the more pennants you will need.

2. Now you can cut the copied pennants out of your cardboard sheet – asking for help is absolutely fine. Cut out the holes shown on the pattern. It is easier to use a hole punch.

3. Now you can thread together the pennants. Be creative and decorate them.

Lovely Tassels

You need:

- colourful tissue paper
- cutter
- ruler
- cutting mat
- string to thread together

1. Fold the tissue paper once down the center. For the next step you're allowed to ask for help. Cut stripes with your cutter, always at the same distance.

CAUTION Stop cutting approximately 5cm before you reach the fold.

2. Unfold your paper carefully. Now roll it into a thin roll.

3. Twist the middle part of the roll and bend it down right center. Now twist the two edges together, creating a little hole on the top. This helps to thread together your tassels to create a most amazing garland.

The Amazing World of Fairies

Paula is the little fairy offspring. Her last birthday gift was a butterfly-shaped magical wand to reward her for the many wishes she makes come true every day. Now if she wants to fly through the sky with her best friend, just a wand swing lets the fairyland visitor grow wings. They love to spend time together, so Princess Chloe sees Paula in her amazing world as often as possible. Then, they endlessly play with the fairyland animals and hold tea parties packed with goodies.

GOOD TO KNOW

ARE ELVES AND FAIRIES THE SAME?

The words elf and fairy mean the same, only they have a different origin. Did you know that? Fairy originates in the French language and means enchantress. Whereas elf bears its origin in the Scandinavian language. In Iceland one even can study the subject elf-teachings. The oldest historical records about fairies date back to the medieval, so they are older than 1,000 years.

Sparkling Unicorn

You need

- scissors
- cardboard
- colourful glitter
- glue
- cutting mat

To download the pattern, visit our painting & puzzles website and print onto the paper goetz-puppen.de/en/painting-und-puzzles.html

1. Print the pattern below onto the cardboard. Cut it out – if you need a hand, your parents surely won't mind helping.
2. Spread the glue onto one side of the cut-out unicorn – distribute carefully to make sure the glitter stays on.
3. Sprinkle the glitter onto the unicorn – you can repeat this step. Work on a cutting mat to reuse the glitter falling aside.

Straws and Cups

You need

- colourful straws
- paper cups
- sparkling unicorns
- hot glue gun / liquid glue

Having finished your sparkling unicorns – you have various options to use them as decoration.

1. A splendid decoration for your paper cups. To attach them securely, use the hot melt gun. Carefully, or with help of an adult, distribute the glue onto the back of your glitter horse.

CAUTION This can be very hot – ask for a helping hand.

2. If you like, you can also decorate the straws. Attach one sparkling unicorn on the upper end of your straws.

Having Fun at Sports

Hannah loves Physical Education, especially gymnastics. Can you believe it, she does a handstand. Since she saw a ballet in the opera house, she also takes ballet lessons. Wearing her ballet dress she feels so elegant and beautiful, just like a prima ballerina. With her best friend she shares another hobby - horseback riding. When the weather is nice, she enjoys it most, for she can lead the ponies to the paddock and feed them with grass.

Emphasize on Exercise

Sports are very important for your whole body just as for your brain and soul. There are countless kinds of sport, but they are alike in one thing: you can look marvellous. Whether on the tennis court or on your bike, whether alone or with friends. Number one sports in Germany is not football, but biking with 27,1%. This is not surprising, for many people in Germany use the bicycle to get from A to B.

GOOD TO KNOW

WHERE DOES BALLET ORIGINATE?

Arisen in the Italian and French courts, ballet has been existing for 500 years already.

Ballet has five essential poses. Those build the base of any ballet course. Maybe you are familiar with the tutu. Marie Taglioni was the first to wear a tutu as well as pointe shoes. Until today she is the most well-known ballerina ever.

Be brave, try a pose!

Position No. 1

To have the 1st pose in ballet off pat, you need to turn your feet outward, without moving your hip, and leave your heel in one line next to each other. Your legs are closed and straight. Your arms create a circle in front of your body, the palms of your hand show in direction and height of your belly button. Your fingertips are close but do not touch.

Sun and Sea

Elisabeth loves the sea. No summer passes without a holiday at the sea. She jumps into the sea to cool off from the warm sun, she builds big sandcastles together with friends she met on the beach. Last year her big brother allowed her to bury him in the sand. She got new sand molds for her birthday this year as well as armbands. Both are a must-have for the beach this year.

GOOD TO KNOW

HOW DOES THE SAND GET TO THE BEACH?

Don't you like to stroll through the sand at the sea, and feel the touch of the little granules between your toes. Did you ever think about how all this sand got to the beach?

The sand originates in the mountains and managed a long way. Sometimes rock fragments loosen and roll down the hill. This is when it burst into thousand of little pieces. Some of those end in rivers or creeks. Drawn within the water flow the little stones grind and become smaller and smaller. The rock fragments become granules – we do know those to be sand.

The river flows into the sea and the waves spread the sand on the beach evenly. Brilliant – we can built sand castles.

WHAT IS MIDSUMMER?

The 21st of June is the longest day of the year. It is called midsummer.

In Sweden it does not really turn dark. Therefore, they celebrate midsummer. Girls and women wear special traditional costumes and floral wreaths.

Splish, Splash

There is nothing better than visiting the swimming pool. Marie loves to float in the water on her back to watch the sparkling sun in the water with her armbands on. Of course she enjoys the yellow water slide just as much. At first her mum needed to hold her, but now she has the courage to slide on her own. But guess what she enjoys most! Mum treats her with jelly babies, when they are at the swimming pool.

GOOD TO KNOW

WHY DO WE NEED SUNSCREEN?

If too many sunbeams hit our skin, they harm it. You'll get a slight burn we know as a sunburn. If we do use sunscreen, the beams cannot hit our skin directly for a certain period of time, so it stays protected.

Riddle Fun

SEARCH FOR MISTAKES AFTER THE STAY AT THE POOLSIDE

THERE IS SOMETHING MISSING!

After a splendid day at the pool, Elisabeth would like to take her two corresponding swim rings. Oh dear - suddenly there are so many around! Can you help and find the two alike?

If you wish - colour the two rings alike in your favourite colour.

Solution: Rings 4 and 5 are the same!

GOOD TO KNOW

HOW MUCH DO YOU KNOW ABOUT SWIMMING?

Swimming is a very healthy exercise. Certainly, already you did swim a lot, for it is fun and cools you down in summertime.

But swimming also supports your health. The pressure of the water onto your body causes less easy breathing. But this strengthens your lung muscles - you are fitter. And by the way, we do feel $\frac{1}{2}$ lighter in the water than on land, no wonder we feel so easygoing.

Also our joints love to be in the water, for there is nearly no pressure on them. Right from the beginning swimming has been an Olympic class with various disciplines.

In the 1st Olympic games in Athens the swimming disciplines took place in the open sea with 13 degrees water temperature. Swimming pools as we are familiar with, did not exist.

Are you looking for the perfect summer hairstyle? Try the look out on our styling girls.

Feeding Ducks in the Park

Elisabeth enjoys strolling in the park next to her grandma's home. It is not far to go to reach the little duck pond there. Grandma keeps old bread crumbs for her to feed the ducks. Sitting on the little wooden bench, she could watch them for hours. Sometimes her friend Hannah with her dog Frodo accompany Elisabeth. Together they have a picnic with delicious cake made by Hannah's mum. They throw a stick for Frodo until he wearily curls up on the blanket. Shhh - can you hear him snoring?

Cupcakes with Horses

You need:

- glitter horses
- toothpicks
- hot glue gun
- yummy cupcakes

To download the pattern, visit our painting & puzzles website goetz-puppen.de/de/malen-und-raetseln.html and print onto the paper

CAUTION Hot glue guns get really hot – ask for help if you are insecure!

1. Let your parents help you with the first step. Glue one of your glitter horses onto the upper edge of the toothpick.
2. Now you can stick your glitter horse stick into the cupcake. In the twinkling of an eye your pastries turn into the most amazing eye catchers.

GOOD TO KNOW

WHAT IS A STONE DWARF - DO YOU KNOW?

Did you have a walk in the park or along a river and did you spot stones piled onto each other?

Those are called stone dwarfs or cairns. The stone dwarfs have been existing a very long time and can be found all over the world. Though they do not have the same purpose, it differs from site to site. For example, in Greece they function as sign posts, whereas in Scandinavia they should protect from trolls. In the Antarctic they mark good spots for fishing and in South America they are poles for land survey to build new houses.

Here, they are decoration alongside of rivers, trails or lakes mainly. To build your own stone dwarf, just pile flat stones onto each other. Start with the large ones and use smaller ones the higher you get. To increase the challenge, use more round ones.

GOOD TO KNOW

DID YOU EVER FLY A KITE?

Kites were mentioned first in China 2,600 years ago. They were made of silk and bamboo.

Just 500 years ago Europe got to know kites. Today they are made of plastic foil. To fly a kite you need to be in the right place. Also, your kite must not fly higher than 110 yards.

Swinging over the Ice

For weeks Emily has been waiting for icy temperatures and the snow. She got new ice skates for Christmas with glitter shoelaces, and now she cannot wait to try them. Last year she nearly managed to pirouette! But the icy temperatures did not last long enough for her to practice the pirouette to perfection. The ice on the lake melted. Maybe she is lucky tomorrow, the weather forecast predicted minus degrees for the night. Keep your fingers crossed!

GOOD TO KNOW

WHY DOES THE ICE NOT MELT ON A SKATING RINK AT WARM TEMPERATURES

An artificial ice rink is similar to a frozen lake. But why does the ice not melt at a temperature of zero degrees?

The rink is built on ordinary concrete. Pipes, conducting freezing water, are beneath the floor.

When spraying the water onto the rink, it freezes immediately. To ensure thick enough layers, this is repeated over and over again. Thanks to the cooling device, the ice stays smooth and does not melt at warmer temperatures.

GOOD TO KNOW

WHAT IS THE SECRET OF THE PERFECT SNOWBALL?

Surely you were in a snowball fight and your snowballs did fall apart.

Following these tips can help. Water acts with snow like a glue, so the ice crystals do not fall apart. Simply wet the snow a little and you can form it into a ball. If you want to have the ultimate snowball, make it without gloves on!

The heat of your hands will cause the snowball to form a thin sheet of ice which means that it won't fall apart as easily.

If there is a lot of snow, you can make differently sized snowballs and put them on top of each other - from largest to smallest. Do you know what that is? A snowman, of course!

Babies like it Cosy

In the wintertime, babies get cold easily, so keep them cosy and warm with our winter collection.

TO HANDICRAFT WITH MUM AND DAD

Creative Fun

Decorative Stars

You need:

- 8 pieces of grease-proof paper bags
- pencil & glue stick
- scissors & thread

Differently shaped tips make for different looking stars!

1. Follow the shape of a "T" with the glue stick onto the paper bag and glue one bag after the other on top of each other.
2. Draw a tip on to the edge of the open part of the bag and cut it.
3. On one side again you do glue the "T". Then, you can fold up the star and glue it. Help from a parent or grandparent would be beneficial.
4. Nearly done - just glue the thread onto the star and hang it up.

Hustle and Bustle amongst the Toddlers

Emily's little sister joined the nursery school this morning, so mum can run errands. Emily accompanied her the first day. She was allowed to see everything. How many marvelous toys there are, although most of the toddlers are so little still. A nurse makes sure that all babies get their bottle. The older children have a tasty lunch, like Emily's favourite meal spaghetti with tomato sauce! They even have to hold their afternoon nap, Emily is relieved – she can stay up. So she can use the time to play and not waste it sleeping.

HOW DO BABIES ACT UNDER WATER?

Right after they see the light of day, babies master something you would never suppose.

Underwater mysteriously they hold their breath and start to paddle with arms and legs just as if they would swim. Of its own volition, their heart beats slower. They never learned this, so how is it possible?

Responsible is a reflex. A reflex is something your body does automatically under certain circumstances. After five to eight months, this reflex disappears, for then they have gained the ability to know when to hold their breath. However, the reflex to decrease the heartbeat underwater stays lifelong - everybody has it.

GOOD TO KNOW

WHY DO WE GET WIZENED HANDS WHEN SPLASHING IN THE WATER?

Surely it caught your eye: If you stay in the water too long, your hands and feet become wizened.

This is due to our skin consisting of several layers. Especially our hands and feet have a lot of hard skin (since we grab and work with our hands and our feet bear our weight) like a sponge this hard skin absorbs the water and expands. The skin buckles and becomes wizened. When the skin dries, it turns even again and looks as usual.
