

TINKER YOUR VERY OWN *Apiary*

Wrap your tin with wool in the traditional bee colors. To change the color just add the new one with a knot onto the wool string before.

Your bee body get the legs now. Just knot 6 strings same length on the lower edge of your tin. Thread a wooden pearl on each string edge.

Glue to eyes onto the tin and fill you tin with straw, little branches or tigs.

Now tie a woolen string around your tin and hang your apiary into a tree or somewhere on the balcony. Tada! Bees and bugs can move in.
