TINKER YOUR
DREAMCATCHER FROM AN OLD CD

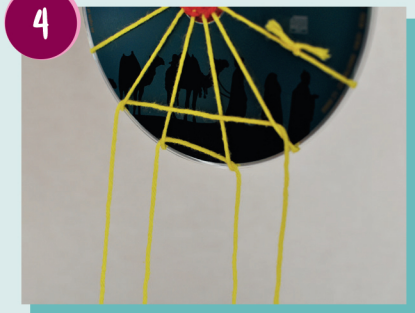

1 Cut a 150 cm long string of wool. Wrap it several times through the hole of your CD around the CD. Tie the edges together.

2 To create a colorful dream catcher, fix a wool string in the center of your CD. Thread those strings alternately over and under your threads spanned in step 1.

3 To change the color just tie the following color onto the edge of the previous color. Cut off the excess of the previous color and repeat step 2.

4 Your dream catcher has enough color? Then it is about time to fix two long wool strings on the back and to thread pearls onto those. To prevent them from falling off finish with a knot.
