

Flower balls

FOR BEES

Mix 5 tbsp flower soil, 1 tbsp flower seeds of your liking and 1 tbsp clay in a big bowl.

Then add water drop by drop and knead the mixture until it forms an even mass. Shape your mass into balls the size of walnuts.

Let the flower balls dry in an egg box.

Dig your flower balls in the earth to awake them. After some time you will see flowers grow right where you buried your flower balls. Psst - can you here the bees hum?
