# STORY TO TELL

## *The Grasshopper Hopp & the Bees*

It is spring and on the small meadow of the Grasshopper Hop all the flowers begin to bloom and shine. Hop loves the peace and quiet while bouncing over the meadow and is fascinated by the variety of its beautiful colorful flowers.

The sight of the flowers fills him with great joy. One day, a group of bees settle in the garden. She hums and hums in the garden from flower to flower. The Grasshopper Hopp feels very disturbed by the buzzing and humming and is not at all enthusiastic about his new neighbours. Finally, he overcomes himself and asks what the bees would do here and why they buzz around so much.

The bees told Hop the grasshopper that they have to fly around so much to find the most beautiful flowers for honey making and to pollinate other flowers. Hop experienced, so that only by pollinating the bees every year its beautiful flower meadow is brought back to life, because without bees there is no honey but also no plants and flowers.

This fascinated Hopp and filled him with awe. He loved his flowers so much. So he started to help the bees. He jumped happily over this meadow and showed the bees new beautiful flowers so they could find them faster. The bees were very grateful for Hopp's help, even if it was not as efficient as that of the bees. However, the collaboration helped the bees to produce even more honey than before. It filled the garden with the sweet scent of honey and beautiful flowers again next year. All lived together peacefully and were happy and content.

The moral of the story is that cooperation and mutual help lead to great success and happiness!

## Tutti Frutti Cocktailumbrella

The **Tutti Frutti cocktail umbrellas** are the perfect tinker fun. No matter if watermelon, lemon, orange and kiwi or exotic fruits such as dragon fruit, passion fruit and papaya!

1. The beginning for all Tutti Frutti children's cocktail umbrellas is a circle  $\varnothing$  approx. 16 cm, which is folded 8 x in the middle. After folding, alternately press the small triangles inwards and outwards, an umbrella shape is created.

2. You can design different fruits! For example, for a watermelon, cut a slightly smaller circle. Then you stick it with black glue dots and fold this paper circle 8 x in the middle.

3. Next, lay both pieces on top of each other and pierce the top with a needle. Skewer a wad-tekball on a wooden skewer and then the paper umbrella. An iron bead forms the top of the screen.

4. At best, all parts are now firmly on the rod. If this is not the case, a drop of glue will help to fix the parts. The protruding piece of wood skewer can be cut off.

### You need:

Clay paper or coloured printing paper 80-120 g, small glue pon pons  $\varnothing$  8 mm, wooden skewers, cotton balls  $\varnothing$  10 mm, ironing beads, possibly circles and scissors, glue.
