Icecream in a cone

You love icecream just as much as Elisabeth? Than create some icecream cones for your doll and yourself. Enjoy being creative!

MATERIAL

cones:

- brown construction paper
- white crayon
- scissors
- saucer (app. 14cm)
- double.sided adhesive tape

icecream:

- cotton wool globes
- acrylic colours
- confetti
- wooden sticks
- paintbrush
- glue

1.

Use your saucer to paint a circle onto your brown construction paper and cut along the drawn line. Draw with the white crayon a honey-comb pattern. To create a cone with your circle, it is ok to ask for help. Flap one side of the circle ontop of the other and glue those overlapping paperparts onto each other. Use your double-sided adhesive tape.

2.

The cotton wool globes are easy to colour, if you fix them onto your wooden sticks. You can hold and turn the sticks with one hand, the other hand can colour them with your acrylic paint. Just put your cottonglobe sticks into a glas to let it dry. Dry - than glue your confetti onto the icecream and create the most colorful icecream in a cone.

If you cut different sized circles & you use different globes, you can create icecream in different sizes!
